

Dr. Wong is a scientist with the USDA-ARS at the Western Regional Research Center in Albany, California. His research focuses on enzymatic conversion of agricultural waste to value-added products. Dr. Wong has over 100 publications including a number of patents. Dr. Wong is book author of *Theory and Mechanism in Food Chemistry* and its Spanish edition, *Food Enzymes: Structure and Mechanism*, and *The ABCs of Gene Cloning*, and co-editor of the *Handbook of Food Enzymology*. Dr. Wong serves on the Editorial Board of *Protein & Peptide Letters*, and *The Open Enzyme Inhibition Journal*. Dr. Wong was elected Fellow of the American Chemical Society, Ag and Food Division in 2002 for "outstanding scientific contribution to the field of agricultural and food chemistry". He was recipient of Federal Laboratory Consortium Award for excellence in Technology Transfer in 2001, and ARS Superior Technology Transfer Achievement Award in the following year.
